

Spike:**Title:** [Intro to Visual Studio](#)**Author:** [Steven Efthimiadis, 1627406](#)**Goals / deliverables:**

The goal is to create a report for someone who is new to Visual Studio and explain how to start up a new project.

To create this spike, you require:

- Basic report of how to use Visual Studio

Technologies, Tools, and Resources used:

List of information needed by someone trying to reproduce this work

- Visual Studio 2015

Tasks undertaken:

Before creating a walkthrough, you must:

- Have used Visual Studio before
- Understand how to debug using the available tools
- Create a break point
- Inspect variable while the program is running.

What we found out:

- You can check the variable value while the program is running.
- Multiple ways you can build a program
- How breakpoints work
